Professional Summary

I am a dedicated and resourceful professional passionate about IT, cybersecurity and problem-solving. I possess a unique combination of technical expertise and project management experience. My career spans from managing complex construction projects to mastering cybersecurity skills in virtual environments. With hands-on experience in system administration, penetration testing, and network security, I am eager to bring my communication skills problem-solving abilities and technical know-how to a cybersecurity role.

- MITRE ATT&CK, OWASP, NIST, OSINT, ISO2700

Professional Experience

Builder | Project Manager | Owner

RPC Construction | Melbourne, VIC | 2014 – Present

- Led various home renovation and extension projects, ensuring quality, safety, and client satisfaction.
- Adapted health and safety protocols during the COVID-19 pandemic, demonstrating flexibility under evolving regulations.
- Developed strong risk management and incident resolution abilities, applicable to assessing cybersecurity risks.

Facilities Maintenance Coordinator

Weta Digital, Wellington | New Zealand | 2009 – 2012, 2024 - Present

- IT infrastructure support on a casual basis to the Melbourne offices(2024).
- Provided technical infrastructure support for major film projects, including Avatar and The Hobbit.
- Collaborated with IT Support for a staff of 1,200, refining my large-scale systems management capabilities.

Health and Safety Coordinator / Site Supervisor

Procan Construction | Vancouver, Canada | 2013 – 2014

- Managed safety for large-scale renovations, ensuring zero major incidents.
- Supervised a team of 20 contractors, honing leadership and project management skills.

Teacher / Co-Founder

Eureka English | Osaka, Japan | 2012 – 2013

- Co-founded and managed an English language school, focusing on phonics and pronunciation.
- Designed engaging curriculums and managed school operations, showcasing entrepreneurial spirit and leadership.

Security Projects

Enterprise Virtual Lab

- Developed a virtual enterprise environment to practice skills in Windows Active Directory, network administration, and system configuration.
- Utilised virtualisation tools (Proxmox) and security monitoring (Zeek, Wazuh, firewall logs) to manage a secure virtual environment.

RFID Cloning Project

- Co-developed an RFID cloning system using Raspberry Pi and ESP8266 to demonstrate security vulnerabilities in wireless communication protocols.
- Hands-on experience with both hardware configuration and software development.

Penetration Testing

- Conducted penetration tests on various systems, including websites and Active Directory virtual machines.
- Delivered comprehensive penetration reports with actionable recommendations.

Volunteering Experience

Brunswick Soup Kitchen - Food delivery and preparation for at-risk and homeless community members.

Brunswick Tool Library - Board member and store clerk.
